

## ENVIRONMENTAL POLICY

August 2020

Wiluna Mining Corporation's strategy is to be known as a leader at the forefront of building and operating profitable mines through the identification and development of geologically superior natural resource opportunities.

### Intent

Wiluna Mining Corporation is committed to the protection of the environment, striving for excellence in environmental performance throughout its operations.

### To achieve this Wiluna Mining Corporation shall:

- Implement, maintain, and continually improve its Environmental Management System.
- Identify significant environmental aspects and associated environmental impacts and implement effective prevention and mitigation strategies and controls.
- Identify and fulfill all compliance obligations related to our environmental aspects.
- Promote sustainable use of resources and emission reduction initiatives.
- Minimise waste generation and appropriately dispose of all wastes.
- Integrate mine closure and progressive rehabilitation into the life cycle of our operations to minimise our environmental legacies.
- Ensure that all staff and contractors are informed of this Policy and made aware of their environmental responsibilities.
- Communicate and consult with relevant interested parties in relation to environmental matters; and
- Provide adequate resources for managing and improving environmental performance.
- Recognise the individual and shared responsibility both management and employees have to implement this Policy; and
- Ensure this policy is reviewed at least annually and applies to all Wiluna Mining Corporation site activities.
